Spring 2019 Music Theory Tutors

Please note:

- Individuals on this list are current and former music theory AIs who are willing to tutor, for pay, students enrolled in the courses indicated.
- Payment rates are set by mutual agreement between the tutor and the student.
- An AI may not receive payment in exchange for tutoring a student in the class for which they are an AI—not even for tutoring a student in a different section of that class. (Students are, of course, encouraged to seek occasional assistance from their own AIs in the context of office hours and individual meetings.)
- This list is provided only as a convenience to students and doesn't reflect any endorsement on the part of the Department of Music Theory.

✓ = willing to tutor for the course indicated

(AI) = currently serving as an AI in the indicated course and therefore ineligible to receive payment for tutoring students in this course
